Berliner Oberseminar

Nichtlineare partielle Differentialgleichungen

(Langenbach-Seminar)

Priv.-Doz. Dr. A. Glitzky (WIAS)
Priv.-Doz. Dr. M. Liero (WIAS)
Prof. Dr. M. Thomas (WIAS, FUB)
Prof. Dr. B. Zwicknagl (HUB)

7.5.2025	R. 405/406	Prof. Dr. Edriss Titi (University of Cambridge, Texas A&M University, and Weizmann Institute of Science): On a generalization of the Bardos-Tartar conjecture to nonlinear dissipative PDEs
14.5.2025 2.00 pm	R. 405/406	Prof. Dr. Pierluigi Colli (Università Pavia, Italy): Solvability and optimal control in spatially structured epidemic models
14.5.2025 3:30 pm	R. 405/406	Dr. Andrea Signori (Politecnico di Milano, Italy): Mathematical models of active phase separation and droplet dynamics
28.5.2025	ESH ?	Moritz Gau (WIAS): A variational approach to well-posedness and relaxation in viscoelastic phase separation

Die Vorträge beginnen jeweils um 14:15 Uhr.
